

Pregnancy and child birth.

Before writing this article I would like to draw the reader's attention to the code of ethics of Angelic Reiki which is displayed in full on this web site. (See About Angelic Reiki; Code of Ethics).

Birth and death are primary processes in our lives and Angelic Reiki focuses specifically on them.

Esoterically birth is regarded as a detaching from the connection to the divine self and death the re-bithing from this limited perception of self.

To be conceived, to grow and be bathed in a bath of Angelic energy is a wonderful gift.

A anatomical description of what Angelic Reiki brings is in the book. Below is an extract.

CHAPTER NINE FROM THE ANGELIC REIKI BOOK 'THE HEALING FOR OUR TIME'

There have always been special people being born on the Earth, but now there is an increase in the number of those with special gifts. They are mainly children, but this current wave of gifted and spiritually aware beings started around the end of the Second World War. The special children who have been born in the last thirty or so years have been given various names, such as Indigo, Rainbow and Crystal children. These names come from the energy around them. There is now an extraordinary number of these children and recent research and publications have documented their amazing talents. For example the Chinese government has recognised for twenty-five years there are what they are calling, "super psychic children". The abilities of these children are amazing. In research done with them, they were given a closed book and told a page number. Without opening the book, they were able to read accurately what was on that page. There are lots of children at the moment with phenomenal abilities, especially in the sphere of music and art. These children have talents way beyond their age. It is estimated that nearly 20 percent of children being born today have some special ability. Parents can sometimes find these children difficult as they have a great sense of independence and know their own mind. They do not respond to being spoken to like children very well. They are wise beyond their years and can see the pointlessness of many things parents think are important; such as school! Many Indigo and Crystal children are diagnosed as having Attention Deficit Disorder (ADD) because of their unwillingness to concentrate on

what we think is important. They often have psychic abilities and look as if they are daydreaming and just gazing into space, but they are looking at what they can see on other planes of reality.

The time of pregnancy can be difficult for the mother of an Indigo or crystal child. In the chapter on “Ascension Symptoms”, I described the connection between consciousness and the physical body. The mother’s endocrine system and hormonal balance matches her consciousness. When an Indigo or crystal child is conceived, often a higher consciousness is trying to merge with the body of the mother. This can require a different hormonal balance to the one the mother currently has. The body of the mother tries to adjust to the new incoming consciousness. The hormonal rebalancing can cause a prolonged time of morning sickness. In fact this can last all day and up to six months. Not only is this very difficult for the mother but neither she nor the fetus may be receiving the nutrition they need. Doctors always try to avoid giving drugs during pregnancy, but sometimes if the mother is not getting enough nutrition, these are needed. Unfortunately the chemicals in the medication will not support the hormonal changes that are trying to take place.

Kevin and I discovered one of the gifts of Angelic Reiki very soon after the system was channelled. When a woman who had attended one of these first workshops became pregnant and was having a difficult time she phoned Kevin to ask for a healing. When he went to do the healing, after doing the preparation and talking with her, he asked for the most perfect Angelic presence to manifest for that healing. The Angel that came in for the healing was the one that was going to incarnate through this baby. The healing brought the exact balancing on a physical and consciousness level, the mother needed so that this new being could be born. Kevin found that this healing needed to be repeated about every two weeks for the first six months.

Angelic Reiki healings during pregnancy also created a link between the spiritual and physical worlds. This link makes the process of birth easier and also creates a greater feeling of home for the baby after it is born.
